PROFESIONAL SUMMARY

Graduate in B-Tech Computer Science and Engineering. I am passionate about programming and problem solving, and building innovative digital solutions. Seeking opportunities to collaborate on innovative projects, enhance my technical expertise, and contribute meaningfully to impactful solutions within the tech industry. I have experience in front-end and back-end development. I am committed to expanding my knowledge and apply my skills to real-world challenges.

EDUCATION

- **Bachelor of Technology in Computer Science And Engineering** **2022-2026**
• G H Raisoni College of Engineering And Management Jalgaon
• **CGPA: 9.00**
- **Higher Secondary Education** **2021-2022**
• Sardar G G Highschool And Junior College Raver
• **Percentage: 87.83%**
- **Secondary School Certificate** **2019-2020**
• Swami Vivekanand Vidya Mandir Raver
• **Percentage: 88.60%**

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, C, C++, SQL
- **Frontend:** React.js, HTML, CSS, Responsive UI Design
- **Backend & APIs:** Node.js, REST API Design , FastAPI
- **Databases:** DBMS, MongoDB, SQL (MySQL/PostgreSQL)
- **Tools:** Git, GitHub
- **Web Frameworks:** Bootstrap, Tailwind CSS, Flask
- **Soft Skills:** Communication, Problem Solving, Team Work

EXPERIENCE

- **Internship: Intern at Infosys Springboard** **June 2026 – Aug 2026**
Developing a full-stack Feature Flag Management System using React.js, FastAPI, Python, PostgreSQL, and SQLAlchemy. Implemented CRUD operations, REST API integration, feature flag evaluation, environment management, and user/group targeting while gaining hands-on experience in full-stack development, database design, debugging, and Git/GitHub.
- **Google Student Ambassador Program 2026** **June 2026 – Sept 2026**
Representing Google Student Ambassador on campus by promoting Google technologies, organizing learning initiatives, creating technical content, and engaging with the student community. Building expertise in AI, Google Cloud, prompt engineering, leadership, communication, and community engagement through workshops and hands-on activities.
- **Google Arcade Facilitator Program** **July 2024 – Dec 2025**
Participated in the Google Arcade Facilitator Program, completing hands-on labs and skill-based challenges on Google Cloud and Generative AI. Strengthened practical knowledge of cloud computing, AI tools, problem-solving, and emerging technologies through guided learning and interactive activities.

CERTIFICATES

- **HackerRank:** SQL Basics ()
 - **AWS:** Foundation of Prompt Engineering ()
 - **Cisco Networking Academy:** Python Essentials ()
 - **Cognitive Class:** SQL & Relational Databases 101 ()
 - **Google Cloud Arcade Facilitator Program:** Arcade-Gear Badge ()
 - **Google Cloud Hack2skill:** Gen AI Academy APAC 2026 – Cohort 3 ()
-

PROJECTS

- **Application Feature Planning and Release Governance System:** ()
 - Developed a Feature Planning and Release Governance System to manage application features, track development progress, and streamline release workflows.
 - Implemented feature lifecycle management, role-based approvals, release planning, and status tracking to improve collaboration and deployment control.
 - Built a centralized dashboard for feature visibility, release governance, and progress monitoring, enabling teams to make informed release decisions.
 - **AI Based Resume Analyzer Using GroqAI:** ()
 - Developed an AI-powered Resume Analyzer using Groq AI, Python, and Flask to analyze resumes and extract key skills, experience, and relevant keywords.
 - Implemented resume–job description matching to evaluate job relevance and identify missing skills and keywords.
 - Generated AI-driven resume improvement suggestions focused on ATS optimization, keyword alignment, and overall resume quality.
 - **Café Management System:** ()
 - Developed a Café Management System using Python, Flask, SQL, HTML, and CSS to streamline daily café operations.
 - Implemented menu management, customer order processing, billing, and sales record management for efficient order handling.
 - Designed a user-friendly interface to simplify café workflows, improve order accuracy, and provide centralized management of sales data.
 - **MediAssist AI Website:** ()
 - Developed an AI-powered telemedicine platform using AI-based symptom analysis to provide users with preliminary health guidance.
 - Implemented real-time symptom checking that analyzes user inputs and generates instant AI-driven preliminary insights.
 - Designed a user-friendly platform that enables users to receive initial guidance before connecting with a doctor, improving accessibility and streamlining the consultation process.
-
